

NIKHIL MALI

Full Stack Developer | MERN Stack | REST APIs | AI Agents

+91 7083851720 | nikhilmali3141@gmail.com | [LinkedIn](#) | [Portfolio](#) | [GitHub](#) | Pune, Maharashtra, India

PROFESSIONAL SUMMARY

Full Stack Developer skilled in the MERN stack, Next.js, and TypeScript, with hands-on experience architecting RESTful APIs, secure authentication systems, and AI-powered features using LangChain.js and the OpenAI API. Proven track record of independently building and deploying production-ready projects end-to-end, from architecture through live deployment.

TECHNICAL SKILLS

Languages : JavaScript (ES6+), Tailwind CSS, Python

Developer Tools : VS Code, GitHub, Postman, HTTPie, Docker, Cursor

Databases: MongoDB, PostgreSQL,

Technologies/Frameworks: Git, NodeJS, ExpressJS, REST, NextJS, WebRTC, Tenstack Query, Tailwind CSS, Vercel, Render

AI : AI Agents, AI Integrations, Prompt Engineering,

PROJECTS

NM Polling Web App

[Live GitHub](#)

Stack: React.js, Node.js, Express.js, MongoDB, Socket.io, JWT, Tailwind CSS, OpenAI API, Vercel

- Architected a real-time polling platform where users can create, share and vote on polls with live result updates using Socket.io WebSockets, ensuring instant synchronization across all connected clients.
- Designed and built secure RESTful APIs with Express.js and JWT-based authentication, protecting all poll management routes and implementing MongoDB aggregation pipelines for efficient vote counting.

NM Auth Service

[Live GitHub](#)

Stack: Node.js, Express.js, OIDC, MongoDB, JWT, Bcrypt.js, React.js, Render

- Engineered a production-grade authentication microservice covering user registration, login, email and OIDC protocol, deployed live on Render.
- Implemented a secure access/refresh JWT token rotation strategy combined with Bcrypt.js password hashing, following industry best practices for stateless, scalable authentication.
- Designed as a reusable, plug-and-play module cleanly decoupled from business logic, making it portable across any MERN stack application with minimal configuration changes.

NM Forms

[Live GitHub](#)

Stack: TypeScript, Turborepo, Monorepo Architecture, tRPC, Next.js, Tailwind CSS, Neon (PostgreSQL)

- Building a dynamic form builder platform enabling users to create custom forms with multiple field types, conditional logic and shareable response links, with form structures stored as flexible documents.
- Leveraging a Turborepo monorepo to manage shared UI component libraries, API utilities and configuration packages across the Next.js frontend and Express.js backend workspaces efficiently.

EDUCATION

Bachelor of Engineering, Computer Engineering

2022 – 2026

Savitribai Phule Pune University, Maharashtra, India

Relevant Coursework: Data Structures and Algorithms, Database Management Systems, Operating Systems, Computer Networks, Web Technologies

CERTIFICATIONS

Full Stack Web Development Cohort 2026 — ChaiCode

[Verify Certificate](#)
