

NIKHIL MALI

Full Stack Developer | Software Engineer | System Design | REST APIs | AI Agents

+91 7083851720 | nikhilmali3141@gmail.com | [Portfolio](#) | [GitHub](#) | Nashik, Maharashtra, India

PROFESSIONAL SUMMARY

Motivated and detail oriented Full Stack Developer with hands-on experience building end-to-end web applications using the latest technologies like NextJs, MERN Skilled in designing scalable RESTful APIs and integrating AI agents and large language models to build intelligent, automated features. Comfortable taking full ownership of projects from initial architecture through production deployment. Passionate about writing clean, maintainable code and continuously learning emerging technologies to deliver impactful software solutions.

TECHNICAL SKILLS

Frontend	React.js, Next.js, HTML5, CSS3, JavaScript (ES6+), Tailwind CSS, Tanstack Query
Backend	Node.js, tRPC, Express.js, RESTful API Design, JWT Authentication, Bcrypt.js
Databases	MongoDB, PostgreSQL, Mongoose ODM, Schema Design, Aggregation Pipelines
AI / LLM	AI Agents, LangChain.js, OpenAI API, Prompt Engineering, RAG Pipelines
Frameworks	Next.js, Turborepo, Monorepo Architecture, Microservices Pattern
Tools	Git, GitHub, Vercel, Render, Postman, VS Code, npm, pnpm, ESLint, Prettier

PROJECTS

CalyM

[Live](#) [GitHub](#)

Stack: *React, tRPC, NextJs turborepo, typescript, ingest, RAG, corsair*

- Architected a real-time email and meeting management where users can manage emails and the calendar meetings through the prompt using the ai agent
- Use the corsair for tool integration and caching the api response for fast rendering

NM Auth Service

[Live](#) [GitHub](#)

Stack: *Node.js, Express.js, OIDC, MongoDB, JWT, Bcrypt.js, React.js, Render*

- Engineered a production grade authentication microservice covering user registration, login, email and OIDC protocol, deployed live on Render.
- Implemented a secure access and refresh JWT token rotation strategy combined with Bcrypt.js password hashing, following industry best practices for stateless, scalable authentication.
- Designed as a reusable, plug-and-play module cleanly decoupled from business logic, making it portable across any MERN stack application with minimal environment configuration changes.

NM Forms

[Live](#) [GitHub](#)

Stack: *TypeScript, Turborepo, tRPC, NextJs, Tailwind CSS, Neon(postgresDB)*

- Building a dynamic form builder platform that allows users to create custom forms with multiple field types, conditional logic and shareable response links, with all form structures stored as flexible MongoDB documents.
- Leveraging a Turborepo monorepo setup to manage shared UI component libraries, API utilities and configuration packages across the Next.js frontend and Express.js backend workspaces efficiently.

EDUCATION

Bachelor of Engineering, Computer Engineering

2022 – 2026

Savitribai Phule Pune University, Maharashtra, India

Relevant Coursework: Data Structures and Algorithms, Database Management Systems, Operating Systems, Computer Networks, Web Technologies
